

Tevyraq Railway Tram Project

Public Meeting

Thursday, June 17, 2010

1:00 p.m.

Kasigluk

(at the Beginning of the Unit 6 Meeting)

6:30 p.m.

Bethel

(Longhouse Hotel Meeting Room)

The Western Federal Lands Highway Division of the Federal Highway Administration, in providing services to the Denali Commission, invites you to public meetings regarding the Tevyraq Railway Tram project.

We are in the process of completing environmental compliance activities and developing plans for the design and construction of improvements to the wooden structure that connects two lakes. The tram is a key element in a nearly 100-mile traditional small boat route that traverses lakes, sloughs, and rivers to provide a connection to the Bering Sea.

Why should you attend this meeting?

The meeting will provide information on the project and solicit public comments for consideration during the design phase.

The project purpose is to:

- Make improvements to allow for better function of the existing boat tram system;
- Reduce impacts to the tundra and improving safety by providing a better surface for walking alongside the tram to push boats along the rails;
- Improve the tram termini to allow for an efficient transfer of boats from the water to the tram.
