Upcoming Local Event:

Celebrating Wildflowers

Seven Devils Mountains, Heaven's Gate

Forest: Nez Perce National Forest

District: Hells Canyon National Recreation Area

Description: The rocky alpine peaks of the Seven Devils climb skyward from the Snake River to over 9,400 feet and are often snow-capped in July. They provide excellent habitat for mountain goats, best viewed from July to September. Heavens Gate lookout offers an incredible view of portions of Washington, Oregon, Idaho, and Montana. Several hiking trails lead to over 90 alpine lakes.

Viewing Information: The open subalpine forests and high elevation grasslands offer spectacular wildflower blooms in July with lupine, phlox, penstemon, buckwheat, stonecrop, Indian paintbrush and phacelia to name a few. On the drive up, watch for elk, white-tailed deer, and ruffed and blue grouse. Also, watch for golden eagle, yellow-bellied marmot, Columbian ground squirrel, pika, and the tracks of black bear and coyote.
