Agness Road Project

We are starting project activities on Sunday or Monday. Sunday afternoon or Monday morning the traffic signal will be installed and operate on yellow light mode. Traffic signs and concrete barrier setups would be done on Tuesday using flaggers to direct traffic. Once this setup is completed, the traffic signal would be switched to automatic control mode. The rest of week would be involved with activities related to delivery and set up of platform for work under the bridge. We apologize for any inconvenience due to traffic restriction and appreciate your patient.
