ISSUE NO. 3
August 30, 2010

Agness Road Project

Since the last newsletter, we have installed the construction signs and traffic signals are operating at both bridges. The hanging access platform for Illinois Bridge spans the entire 1st span of the structural steel section of bridge (about 146'). The power wash has been completed for the downstream girder of span and wash work on upstream is ongoing. Cracked weld repair for pier 2 bearings plate connection to the flange is completed.

The curb and post removal and replacement on Rogue Bridge is starting this week as well as coating of washed girders of Illinois Bridge.
