## BEAVER CREEK ROAD NEWSLETTER

### Construction Progress

Tidewater Contractors Inc. worked mainly off the project this week completing the new access road to the material source they will be using next season. Some minor erosion control measures were completed this week as the construction activities come to a close for the season.

### Construction Activities for the week ending November 27, 2009

Tidewater Contractors, Inc plans to have all construction work completed by the beginning of this week. Work taking place over the following week will be minor and no significant traffic delays are anticipated. Crews from Tidewater will be working to tie up loose ends in erosion control throughout the project and will be finished for the season by the middle of the week.

Dunn Brothers Fencing will continue working on right-of-way fencing throughout the project.

Over the coming months, Tidewater plans to begin crushing aggregate from the material source at the north end of the project. No construction activities will take place in the roadway prism until Spring 2010. Any questions or concerns can be directed to Paul Akehurst, Project Engineer (contact information above).

Here's a review of the construction season!
