

GeoBoreLog Software, Version 1.40 (11/1/2005)

INSTALLATION

1. The software may be installed on any Intel PC running a Windows 98, or later, OS.
2. For Win-2000 and Win-XP, you will need "Administrator Rights" for the install.
3. This is the FINAL version of the GeoLog software.
4. The "Documents" directory on the CD contains the "GeoBoreLog Reference Manual". This file is also installed on the hard drive during installation. You will need Acrobat Reader to view this file.
5. The "gINT File" directory on the CD contains files for importing the GeoBoreLog data into gINT. These files are also installed on the hard drive by the installation -- for location, see Note 6 below.

OPERATION

1. The install will place a "GeoBoreLog" icon on the desktop for starting the program.
2. The install will also place a "GeoBoreLog" folder in the "Start, Programs" menu.
3. This folder contains a link to the "GeoBoreLog Reference Manual" -- a PDF file.
4. You must have Adobe Reader installed on your system to view the "GeoBoreLog Reference Manual".
5. Instructions for importing data into gINT are given in the "GeoBoreLog Reference Manual"
6. The gINT files, mentioned in the Manual, will be placed in the "Support Files" folder located within the installed GeoLog folder . . . -- typically at c:\Program Files\ISDesigns\GeoBoreLog\Support Files.
