Request for Funding
FY 2001

FHWA Strategic Goal Area:

Project Title: Warehouse Bar Code Scanner System

Problem Statement: WFLHD owns the facility housing the division including a warehouse for office and field supplies. As with the other divisions, we also maintain an inventory of vehicles and equipment. The new Fiscal System, being implemented during the summer of 2001, includes an inventory and warehouse tracking element adaptable to a bar code scanner system. Currently, our bar codes have no intelligence only the numbers are used in a manual database. This is inefficient, inaccurate, and outdated.

Proposal: Coordinate a bar code scanner system with the implementation of the new Fiscal System. Purchase a compatible bar code scanner system and implement it with the intelligence for the new Fiscal System.

Benefits: Improved tracking, ordering, and managing of all equipment and supplies for WFLHD operations.

Resources/Cost: \$1,500

Duration: Three months

Organization/Method: The Warehouse Team has researched the available scanners and will select one compatible with the new Fiscal System when it becomes available.
